Answers & explanations

1. A · 2. C · 3. D · 4. A · 5. C

1. **Answer A.** The first pair keeps the shape the same and moves the shading from the top half to the bottom half. Applying that rule to the square gives A.
2. **Answer C.** The first pair turns the shape from sideways to upright without changing its color. The blue shape must turn upright in the same way. This gives C.
3. **Answer D.** The first pair keeps both shapes in place but swaps their colors. Apply the same rule below: the triangle becomes orange, and the diamond becomes green. This gives D.
4. **Answer A.** The first pair matches an object with the sense used for it: you taste ice cream with your tongue. You smell a flower with your nose, so A completes the same relationship.
5. **Answer C.** The pattern adds one bead each time: one, two, three. The next rod needs four beads. This gives C.
