Answers & explanations

1. D · 2. C · 3. A · 4. D · 5. D

1. **Answer D.** The green and white bands must continue across the missing space at the same angle. Only D connects both bands without a break.
2. **Answer C.** The first pair turns the shape from sideways to upright without changing its color. The blue shape must turn upright in the same way. This gives C.
3. **Answer A.** The first pair keeps the shape the same and moves the shading from the top half to the bottom half. Applying that rule to the square gives A.
4. **Answer D.** The diagonal edges and colors must continue across the missing space. Only D lines up with the surrounding blue, orange, and white pattern.
5. **Answer D.** The first pair keeps both shapes in place but swaps their colors. Apply the same rule below: the triangle becomes orange, and the diamond becomes green. This gives D.
